

Wing Display Tower

An innovative stand that provides support for your acrylic panels from the Display Panel Section of this catalog, without having to mount the panels on the wall.

The Wing Display Towers are available in two sizes; 12" wide and 19-7/8" wide. You will need a single 12" wide tower for support of a narrow panel, i.e. APP3.14, as seen in illustration or two 12" Wing Display Towers for support of one larger size panel, i.e. AP.9.14, on each side of the towers as seen in illustration. Other infinite combinations are possible.

Maximum acceptable height for the panels is 55". Panels can be attached on one or both sides of the towers.
