

Mini-Tubix

The top-selling product of CNS Frame Displays is the Mini-TUBIX system, presented by Concept-s. Mini-TUBIX rods are crafted in Germany from high-quality aluminum and are available in open, key-locking or battery-powered lockable versions.

A variety of lengths are offered with a slim profile. The rods can be attached directly to a wall as well as to our acrylic wall-mount panels (page 26), or our point-of-sale (P.O.S) systems (page 46). The clean design and restrained use of material makes the Mini-TUBIX an excellent all-around rod.

Available for 12, 18 and 24 spectacles

Operating mode

Plastic overlay included
